3. Utility of \$BRAVE

- Governance over agent roadmaps, funds, upgrades
- Required to access premium AI agents & simulations
- Used to license or host AI agents (future model)
- Rewards for contributors, testers, and urban simulation node operators
- Potential staking mechanisms for future agent upgrades or validation

4. Phase 2: Strategic Raise with Optional Equity Participation (2026)

BraveShift may conduct a **private, legally structured raise** for long-term backers.

- Participants receive \$BRAVE plus optional equity in BraveShift AG
- Limited to verified, KYC'd contributors
- Structure (SAFT, SAFE, token-equity ratio) to be finalized
- Will not be open to the public or offered on exchanges

Disclaimer: This future raise will be compliant with all applicable laws and subject to change based on jurisdictional and strategic considerations.
